

Simple, Efficient Quality: The RVP

The Rotary Vane Pump, or RVP, is an economical pump designed to dispense various types of fuels and lubricating oils up to 20L/min (5 US gal/min) from drum sizes between 60 L (16 US gal) and 205 L (55 US gal). It replaces the PVRH.

What sets this rotary pump apart from the rest of its kind is that it's a **Macnaught design**. Also – like all Macnaught designed products – it is tested rigorously right here in Sydney, to ensure it meets the highest levels of quality and performance.

Assembled and tested in Australia, the RVP is an excellent choice for your work space.
