

TRIGGER-ACTION *POWER*

The Macnaught POWERPISTOL™ is a single-shot grease gun that combines portability with effortless air-powered operation.

Utilising the air brake compressor, it is ideal for use on trucks and buses and wherever a small compressor is available.

And you're free to multitask, because the POWERPISTOL can be used one handed.

Air, however, is *not* free, and the POWERPISTOL addresses this concern by consuming very low levels of air for effective performance. Given that it runs at 0.026 m³/min (1 cfm), not only is it

inexpensive to operate, the compressor itself will make a smaller footprint, saving you valuable work space as well. What's more – low air consumption is a feature that is **environmentally friendly.**

Backed by Macnaught's ten year limited warranty, with the K53 POWERPISTOL you'll have peace of mind, years of simple, trouble-free use, and you'll be doing your bit, too.
