

RETRACTA®: Proudly Made in Australia Since 1985

For almost a quarter of a century Macnaught RETRACTA reels have been earning customers' trust. Backed by an unmatched 10 year limited warranty, customers can confidently purchase a globally recognised and respected product of the highest quality, manufactured in Sydney, Australia.

The RETRACTA reel's success lies in its superior positive latching mechanism. This ensures latching functionality regardless of orientation, and, with its 180° rotation and lockable wall or overhead mounting bracket, the RETRACTA reel can be mounted in any position.

RETRACTA reel systems are the smart way to keep hoses off floors and protect workers from harm—an important Occupational Health and Safety concern.

Macnaught RETRACTA reels come in a large range of different varieties to suit most applications. The RETRACTA reels' distinctive, weather-resistant, high impact UV stabilised polypropylene shell means they look great wherever they are located, inside or outside.

And they can be located just about anywhere - in workshops, forecourts and factory floors.
